## PAEDIATRIC CBC — DENGUE PROTOCOL (Indian Number Format)

## PATIENT INFORMATION

|               |                             |              |                                  |               |                                     |
|---------------|-----------------------------|--------------|----------------------------------|---------------|-------------------------------------|
| Patient Name: | Chaitanya Gowda             | Age / Sex:   | 9 Years / Male                   | IP No.:       | IP-2026-KRH-08812                   |
| Ward / Bed:   | Paediatric Ward —<br>Bed 22 | Referred By: | Dr. Savitha Rao<br>(Paediatrics) | Day of Fever: | Day 3 — FEBRILE /<br>EARLY CRITICAL |
| Weight:       | 28 kg                       | Height:      | 126 cm                           |               |                                     |

## COMPLETE BLOOD COUNT (CBC) — Automated Haematology Analyser (Sysmex XN-3000)

| Test Name                  | Result       | Unit           | Reference Range     | Flag |
|----------------------------|--------------|----------------|---------------------|------|
| Haemoglobin (Hb)           | 12.1         | g/dL           | 11.5 – 15.5         |      |
| Red Blood Cell Count (RBC) | 4.44         | millions/cu.mm | 3.80 – 5.20         |      |
| Haematocrit (PCV)          | 38.4         | %              | 35.0 – 45.0         |      |
| MCV                        | 86.5         | fL             | 78.0 – 98.0         |      |
| MCH                        | 27.2         | pg             | 25.0 – 33.0         |      |
| MCHC                       | 31.5         | g/dL           | 31.0 – 35.0         |      |
| Platelet Count             | 1,05,000     | cells/cu.mm    | 1,50,000 – 4,00,000 | LL   |
| Mean Platelet Volume (MPV) | 10.2         | fL             | 7.5 – 12.5          |      |
| Total WBC Count            | 2,800        | cells/cu.mm    | 5,000 – 14,500      | L    |
| Neutrophils (%)            | 44           | %              | 35 – 65             |      |
| Lymphocytes (%)            | 48           | %              | 25 – 50             |      |
| Monocytes (%)              | 7            | %              | 2 – 8               |      |
| Eosinophils (%)            | 1            | %              | 1 – 5               |      |
| NS1 Antigen                | POSITIVE     | —              | Negative            | HH   |
| Dengue IgG                 | Non-Reactive | —              | Non-reactive        |      |

## VITAL SIGNS (recorded at time of sample collection)

| Vital Parameter                       | Value   | Unit   | Clinical Status |
|---------------------------------------|---------|--------|-----------------|
| Blood Pressure (Systolic / Diastolic) | 98 / 64 | mmHg   | Normal          |
| Heart Rate / Pulse                    | 104     | bpm    | Elevated        |
| Respiratory Rate                      | 22      | br/min | Normal          |
| Temperature                           | 38.9    | °C     | Elevated        |
| SpO2                                  | 97      | %      | Normal          |
| Shock Index (HR/SBP)                  | 1.06    | —      | Elevated        |
| Urine Output (last 4 hrs)             | 120 mL  | mL/4h  | Normal          |

| CLINICAL DIAGNOSIS / REFERRING NOTES                                                               |
|----------------------------------------------------------------------------------------------------|
| <b>Working Diagnosis:</b> Dengue Fever — Paediatric — Day 3 — WHO Group B (Warning Signs Present)  |
| • Platelet 1,05,000 (one lakh five thousand) — significant thrombocytopenia in paediatric patient. |
| • NS1 Antigen POSITIVE — confirmed dengue.                                                         |
| • Shock Index 1.06 — requires close haemodynamic monitoring.                                       |
| • Paediatric IV fluid: Holliday-Segar → 28 kg → 68 mL/hr maintenance rate.                         |
| • ADMIT: Inpatient monitoring mandatory. Repeat CBC every 8 hours.                                 |
| • Note for CDSS: Platelet reported in Indian lakh format (1,05,000 = 105,000 cells/ $\mu$ L).      |
| • Parents counselled. No paracetamol overdose — 15 mg/kg/dose max.                                 |
